Alchemy Rory Sutherland 2019-05-07 'A breakthrough book. Wonderfully applicable to everything in life, and funny as hell.' Nassim Nicholas Taleb Why is Red Bull so popular - even though everyone hates the taste? Why do countdown boards on platforms take away the pain of train delays? And why do we prefer stripy toothpaste? Discover the alchemy behind original thinking, as TED Talk superstar and Ogilvy advertising legend Rory Sutherland reveals why abandoning logic and casting aside rationality is the best way to solve any problem. In his first book he blends cutting-edge behavioural science, jaw-dropping stories and a touch of branding magic on his mission to turn us all into idea alchemists. He shows how economists, businesses and governments have got it all wrong: we are not rational creatures who make logical decisions based on evidence. Instead, the big problems we face every day, whether as an individual or in society, could very well be solved by thinking less logically. To be brilliant, you have to be irrational.

The End of Alchemy Mervyn King 2016-03-03 'A fearless and important book. . . . The End of Alchemy isn't just an elegant guide to the history of economic ideas. It also gives a genuine insider's account' Telegraph The past twenty years saw unprecedented growth and stability followed by the worst financial crisis the industrialised world has ever witnessed. In the space of little more than a year what had been seen as the age of wisdom was viewed as the age of foolishness. Almost overnight, belief turned into incredulity. Most accounts of the recent crisis focus on the symptoms and not the underlying causes of what went wrong. But those events, vivid though they remain in our memories, comprised only the latest in a long series of financial crises since our present system of commerce became the cornerstone of modern capitalism. Alchemy explains why, ultimately, this was and remains a crisis not of banking - even if we need to reform the banking system - nor of policy-making - even if mistakes were made - but of ideas. In this refreshing and vitally important book, former governor of the Bank of England Mervyn King - an actor in this drama - proposes revolutionary new concepts to answer the central question: are money and banking a form of Alchemy or are they the Achilles heel of a modern capitalist economy?

The Alchemy of Air Thomas Hager 2008-09-09 A sweeping history of tragic genius, cutting-edge science, and the Haber-Bosch discovery that changed billions of lives—including your own. At the dawn of the twentieth century, humanity was facing global disaster: Mass starvation was about to become a reality. A call went out to the world’s scientists to find a solution. This is the story of the two men who found it: brilliant, self-important Fritz Haber and reclusive, alcoholic Carl Bosch. Together they discovered a way to make bread out of air, built city-sized factories, and saved millions of lives. But their epochal triumph came at a price we are still paying. The Haber-Bosch process was also used to make the gunpowder and explosives that killed millions during the two world wars. Both men were vilified during their lives; both, disillusioned and disgraced, died tragically. The Alchemy of Air is the extraordinary, previously untold story of a discovery that changed the way we grow food and the way we

The Thing Which Has No Name Rory Sutherland 2019-03-14 To be brilliant, you have to be irrational Why is Red Bull so popular - even though everyone hates the taste? Why do countdown boards on platforms take away the pain of train delays? And why do we prefer stripy toothpaste? We think we are rational creatures. Economics and business rely on the assumption that we make logical decisions based on evidence. But we aren't, and we don't. In many crucial areas of our lives, reason plays a vanishingly small part. Instead we are driven by unconscious desires, which is why placebos are so powerful. We are drawn to the beautiful, the extravagant and the absurd - from lavish wedding invitations to tiny bottles of the latest fragrance. So if you want to influence people's choices you have to bypass reason. The best ideas don't make rational sense- they make you feelmore than they make you think. Rory Sutherland is the Ogilvy advertising legend whose TED Talks have been viewed nearly 7 million times. In his first book he blends cutting-edge behavioural science, jaw-dropping stories and a touch of branding magic, on his mission to turn us all into idea alchemists.

Paradox Jim Al-Khalili 2012-10-23 A fun and fascinating look at great scientific paradoxes. Throughout history, scientists have come up with theories and ideas that just don't seem to make sense. These we call paradoxes. The paradoxes Al-Khalili offers are drawn chiefly from physics and astronomy and represent those that have stumped some of the finest minds. For example, how can a cat be both dead and alive at the same time? Why will Achilles never beat a tortoise in a race, no matter how fast he runs? And how can a person be ten years older than his twin? With elegant explanations that bring the reader inside the mind of those who've developed them, Al-Khalili helps us to see that, in fact, paradoxes can be solved if seen from the right angle. Just as surely as Al-Khalili narrates the enduring fascination of these classic paradoxes, he reveals their underlying logic. In doing so, he brings to life a select group of the most exciting concepts in human knowledge. Paradox is mind-expanding fun.
