Development and Social Change Philip McMichael 2016-01-25 In this new Sixth Edition of Development and Social Change: A Global Perspective, author Philip McMichael describes a world undergoing profound social, political, and economic transformations, from the post-World War II era through the present. He tells a story of development in four parts—colonialism, developmentalism, globalization, and sustainability—that shows how the global development “project” has taken different forms from one historical period to the next. Throughout the text, the underlying conceptual framework is that development is a political construct, created by dominant actors (states, multilateral institutions, corporations and economic coalitions) and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people, and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful, and clear. Development and Social Change: A Global Perspective challenges us to see ourselves as global citizens even as we are global consumers.

Strategy and Innovation for a Changing World John M Clegg 2021-10-28
Invention and innovation are not the same. When we come up with an exciting and original new idea, by itself that idea is not an innovation
Kindness in Leadership Gay Haskins

2018-03-09
In a global climate of increasing complexity and uncertainty, there have been calls for a more responsible form of leadership in business and society. The relationship between kindness and leadership is therefore a topic of fundamental importance for our well-being as individuals, for the success of our organisations, and for the future of our global community. Kindness in Leadership is one of the first books to explore both the concept and practice of kindness in leadership and consider them in different societal and organisational settings. Its uniqueness lies in combining an innovative mix of personal views from leaders with explorations of organisational philosophies and practices. It opens with a definition of kindness and its contours and underpinnings. It then explores the importance of kindness within different organisations, parts of the world, economic strata, age groups and genders, drawing on research on organisational compassion and neuroscience. In order to support learning, each chapter is supported by a series of questions for consideration and discussion. This will be a stimulating and thought-provoking read for a wide audience of practicing managers and leaders in organisations of all shapes and sizes, for academics involved in educating for leadership, and for students aspiring to develop their own kind and compassionate leadership style.

Saving Us Katharine Hayhoe 2021-09-21
NATIONAL BESTSELLER “An optimistic view on why collective action is still possible—and how it can be realized.” —The New York Times “As far as heroic characters go, I’m not sure you could do better than Katharine Hayhoe.” —Scientific American “It’s not an exaggeration to say that Saving Us is one of the more important books about climate change to have been written.” —The Guardian United Nations Champion of the Earth, climate scientist, and evangelical Christian Katharine Hayhoe changes the debate on how we can save our future. Called “one of the nation's most effective communicators on climate change” by The

New York Times, Katharine Hayhoe knows how to navigate all sides of the conversation on our changing planet. A Canadian climate scientist living in Texas, she negotiates distrust of data, indifference to imminent threats, and resistance to proposed solutions with ease. Over the past fifteen years Hayhoe has found that the most important thing we can do to address climate change is talk about it—and she wants to teach you how. In *Saving Us*, Hayhoe argues that when it comes to changing hearts and minds, facts are only one part of the equation. We need to find shared values in order to connect our unique identities to collective action. This is not another doomsday narrative about a planet on fire. It is a multilayered look at science, faith, and human psychology, from an icon in her field—recently named chief scientist at The Nature Conservancy. Drawing on interdisciplinary research and personal stories, Hayhoe shows that small conversations can have astonishing results. *Saving Us* leaves us with the tools to open a dialogue with your loved ones about how we all can play a role in pushing forward for change.

Alibaba's World Porter Erisman 2015-05-12 In September 2014, a Chinese company that most Americans had never heard of held the largest IPO in history – bigger than Google, Facebook and Twitter combined. Alibaba, now the world's largest e-commerce company, mostly escaped Western notice for over ten years, while building a customer base more than twice the size of Amazon's, and handling the bulk of e-commerce transactions in China. How did it happen? And what was it like to be along for such a revolutionary ride? In *Alibaba's World*, author Porter Erisman, one of Alibaba's first Western employees and its head of international marketing from 2000 to 2008, shows how Jack Ma, a Chinese schoolteacher who twice failed his college entrance exams, rose from obscurity to found Alibaba and lead it from struggling startup to the world's most dominant e-commerce player. He shares stories of weathering the dotcom crash, facing down

eBay and Google, negotiating with the unpredictable Chinese government, and enduring the misguided advice of foreign experts, all to build the behemoth that's poised to sweep the ecommerce world today. And he analyzes Alibaba's role as a harbinger of the new global business landscape—with its focus on the East rather than the West, emerging markets over developed ones, and the nimble entrepreneur over the industry titan. As we face this near future, the story of Alibaba—and its inevitable descendants—is both essential and instructive.
