Buckland's Domino Divination Raymond Buckland 2010-10-01 Tarot cards have been a staple of the divination market for years, as has been the I-Ching, numerology, astrology, tea-leaf reading and palmistry. More recently runes have joined these and become very popular. In 1982 Ralph Blum's The Book of Runes started the trend and a wide variety of books on reading runes is now available. Almost as old as tarot cards are the dominoes, the first records of their use being found in China in the early twelfth century. Although today familiar to most people only as a game, dominoes were originally used by the Chinese for divination and fortune-telling. The reading of dominoes comes under the heading of sortilege and, as such, can be traced back to early Greek and Roman methods of divining the future. Divination with dominoes would seem to be a natural follow-on to the popularity of runes. Domino sets are much more readily available than are runes, which are usually manufactured solely for divination use. To be able to do similar readings but with such an accessible tool could not only fulfill the needs of those who are always searching for new lines of psychic development but could also be instrumental in introducing previously hesitant would-be diviners into the field. One of the unique features of domino divination is the fact that more than one person may be "read" at the same time.

The Rise of Global Health Joshua K. Leon 2015-02-10 Chronicles the expanding global effort to confront public health challenges. Since the year 2000, unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments, multilateral organizations, and civil society groups. This vast global movement is one of the most remarkable political phenomena of twenty-first-century international relations—but is it working? In The Rise of Global Health, Joshua K. Leon argues against the conventional wisdom, which argues that collective action on development issues—including controversial increases in foreign aid—is too inherently inefficient to succeed. Leon shows that public action on a global level can successfully pursue health equality. Often at the behest of grassroots activists, these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health. Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South, we learn something surprising about global health governance—it is evolving in ways more efficient than we think.

The Essential Jesus John Dominic Crossan 2008-03-01 After his definitive The Historical Jesus, John Dominic Crossan delivered Jesus: A Revolutionary Biography—a popularized, bestselling account of what we can know about the life of Jesus. Here he offers the core of his life's work—a concise and astonishing presentation of the authentic teachings and earliest images of the revolutionary Galilean sage. Crossan's fresh translations of Jesus' sayings show Jesus to be a teacher whose radical message that all are equal before God is as timely today as it was two thousand years ago. This picture is dramatically confirmed by the preConstantinian, Christian renderings of Jesus, which show that he was remembered by the first Christians not as God but as a revolutionary healer and leader.

Memory Drawing Darren R. Rousar 2013-03 From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. Memory Drawing: Perceptual Training and Recall exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials, and even enhance your imagination.

Power and Care Tania Singer 2019-05-07 Leading thinkers from a range of disciplines discuss the compatibility of power and care, in conversation with the Dalai Lama. For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics. Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M. Freund, Tenzin Gyatso (His Holiness the Dalai Lama), Markus Heinrichs, Sarah Blaffer Hrdy, Frédéric Laloux, Alaa Murabit, Matthieu Ricard, Johan Rockström, Richard Schwartz, Tania Singer, Dennis J. Snower, Rabbi Awraham Soetendorp, Theo Sowa, Pauline Tangiora, Jody Williams

Unworthy Anneli Rufus 2014-05-15 "Self-loathing is a dark land studded with booby traps. Fumbling through its dark underbrush, we cannot see what our trouble actually is: that we are mistaken about ourselves. That we were told lies long ago that we, in love and loyalty and fear, believed. Will we believe ourselves to death?" —from Unworthy As someone who has struggled with low self-esteem her entire life, Anneli Rufus knows only too well how the world looks through the eyes of those who are not comfortable in their own skin. In Unworthy, Rufus boldly explores how a lack of faith in ourselves can turn us into our own worst enemies. Drawing on extensive research, enlightening interviews, and her own poignant experiences, Rufus considers the question: What personal, societal, biological, and historical factors coalesced to spark this secret epidemic, and what can be done to put a stop to it? She reveals the underlying sources of low self-esteem and leads us through strategies for positive change.

The Real Toy Story Eric Clark 2011-08-31 Toys - from teddy bears to Barbie dolls to train sets - define our image of childhood innocence. But the truth is that toys represent a \$21 billion a year industry, and with so much money at stake, the toy business is anything but child's play. In The Real Toy Story, investigative journalist Eric Clark exposes the startling truths behind Britain's favourite toys. Drawing on interviews with over 200 industry insiders, Clark names and shames the corporations spending millions on research into the best way to manipulate their target audience while manufacturing products in China under virtual slave labour conditions. In a world of cut-throat competition and cold-blooded marketing, toy companies are increasingly willing to sacrifice our children in the rush for profits. And as more children forsake cuddly play things for Ipods and cell phones, companies are using even more extreme tactics- unashamedly using sex and violence to sell dolls and action men to children as young as three - to make sure that their toy is the one that children want to have. The Real Toy Story is essential reading for the millions of adults who care about the toys they choose for the children in their lives.
